

Markus G. Manz, M.D.

M.G. Manz is a German and Swiss physician scientist. He studied medicine, obtained his doctoral degree and completed his medical training in internal medicine, hematology and oncology at the University of Tübingen in Germany. Upon completing a postdoctoral research fellowship at Stanford University Medical School, USA, he established his own research group at the Institute for Research in Biomedicine in Bellinzona, Switzerland. In parallel, he worked as an attending physician at the Oncology Institute of Southern Switzerland.

Since 2009, M.G. Manz is Professor of Hematology at the Medical Faculty of the University of Zurich and director of the division of hematology at the University Hospital Zurich. In 2017 he became director of the department for Medical Oncology and Hematology at the University Hospital of Zurich. He also chairs the Hemato-Oncology Center and the Comprehensive Cancer Center Zurich. He is past president of the Swiss Society of Hematology.

His clinical and experimental laboratory research focuses on healthy hematopoiesis in the context of aging and inflammation, as well as on hematopoietic stem cell malignancies and the improvement of respective treatment options, with a special focus on novel immunotherapeutic approaches.

M.G. Manz received several prestigious awards. He is elected member of the Swiss Academy of Medical Sciences and advises on national and international organizations for the promotion of cancer research.
